BRILL stands for quality and tradition

Already since the establishment of the company in the year 1873 the quality and efficiency of development and production have been the primary focus of BRILL. We started under modest working conditions in an on-site foundry in Wuppertal-Barmen. Today we have modern manufacturing plants as well as a highly developed logistics center at the company's site in Witten-Herbede.

For years our products and services and their reliability have been documented and confirmed with various safety test marks and awards by independent internationally recognized institutions.

To guarantee consistent production quality, the company has been **certified under DIN ISO 9001** since 1997. That means that quality can be checked in all stages of production. That means proven quality for you.

This is what it stands for!

Superior technology, convenient handling, dynamic design

BRILL **evolution** sets new standards in lawn mower technology. Innovative technology and functional design were the decisive factors in the development of the **evolution** series. The revolutionary space-saving concept is optimally tailored to today's requirements. When positioned upright, the **evolution** finds room in the smallest of spaces. The patented dual channel air system guarantees a perfect cut.

The **evolution** petrol mower is equipped with a special tank system, so that it can also be stored upright in a filled state. Particularly pleasing is the low weight of the petrol mowers. They only weigh slightly more than comparable electrical appliances. In this way mowing lawns becomes fun!

Now with mulching function

The DuoAir Management

A dual channel air system with effective cutting technology collects grass and sucks the lawn cuttings in an air flow, resulting in an ideal cutting performance even with the closest cutting height.

More cleaner air for people with allergies

A closed grass box effectively holds dust and pollen. This means that dirt is no longer swirled up and allergy sufferers can breathe a new sigh of relief.

Always at the right height...

The ideal position can always be attained thanks to the adjustable handle bars. The grass box which opens at the back can also be emptied without a change of grip.

The upright position...

A functional design makes the BRILL **evolution** a real space-saver. It is easy to carry or fit into even the smallest car boot. It shrinks in size if not in use. When positioned upright, it finds room in every corner.

Always close...

The BRILL **evolution** can always be perfectly adapted to the right lawn height using the central, adjustable 7 position height settings. The deepest cutting height of 16 mm makes mowing lawns of golf course quality possible.

Getting a grip...

The integrated ergonomical handles are a real relief. They can be used to lift and transport the BRILL **evolution** easily, in addition to placing it in the boot.

The control centre...

Everything comes together cleanly and clearly – at the comfort panel with the useful cable carrier. Mowing with ease at long last!

Well filled...

The grass box level indicator of the BRILL **evolution** is a new practical thing. It can be easily read and you also know when it is time to empty the grass box.

evolution mulching function
For the 41 and 42 series models a mulch box is available as a special accessory. This is inserted instead of the grass box and distributes the mown grass directly on to the lawn. In this way you fertilize your lawn and protect it from drying out.

Practical cleaning...

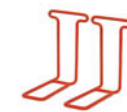

Thanks to its upright position, it can be cleaned after use without difficulty.

There is even a storage bracket available as an accessory, making it possible to hang the **evolution** on a wall without difficulty.

Just right for people with allergies

Friendly to your ears

Kind to your back

Brilliant Features

The **brillencio** from BRILL has literally been created for a relaxed lawn mowing. Its design took on fundamental requirements such as a noise prevention, comfortable handling and as far as possible, protection of those suffering from allergies from dust and pollen.

That is also what has emerged: friendly to your ears, just right for people suffering from allergies and kind to your back.

Friendly to your ears as a matter of principle

The silencer system integrated in the housing „swallows“ the noise volume and at the same time deflects the exhaust gases from the engine directly towards the ground.

Airspace – just right for people suffering from allergies

The closed all-round retaining system prevents the ejection of grass, dust particles and pollen. People suffering from allergies can breathe a sigh of relief.

Technology which is kind to your back

The closed multi-function box covering the grass box at the rear provides noise insulation and optimises the air flow. The folding mechanism of the handle bars enables the grass box to be removed whilst standing in an upright position.

A central and infinitely variable height adjustment of 30-80 cm provides ideal mowing positions.

Magnesium housing – ultra light and unbreakable

The housing of all 43 and 51 models is of ultra light, high impact-resistant magnesium – High-Tech is used in your garden!

The closed silencer concept: Emissions, dust particles and pollen are almost completely encapsulated in the multi-function box. The low-noise blade and the silencer which is integrated in the housing reduce the noise perception by up to 50%.

The **brillencio** enables the grass box to be removed from a standing position, thereby being kind to the back.

The aerodynamically optimised blade guarantees a clean cut.

The height adjustment is central and can be continuously adjusted from 30 to 80 mm.

Upon removing the grass box, the **brillencio** silent-mower becomes a powerful long grass mower.

The complete housing of all **brillencio** 43 and 51 models is made of the ultra light and highly impact-resistant material, magnesium.

Easy start with (e)-comfort

The **brillencio** starts with no problems with this strong 12 Volt power pack whatever the weather. Just turn the key and off it goes. The battery can simply be taken out of the holder and can be charged using an external charger.

State-of-the-art materials

High impact resistance and extremely robust materials characterise the **brillencio**. The housing of the smaller models is made of high-quality PA/ABS plastic.

Ready to start quickly – rapidly stored

Every **brillencio** is ready for work in an instant folded away again and stored so that it saves space. The compact design, the refined folding mechanism and the two integrated handles make it easy.

Ultra-light – extremely stable
What has proved its worth in the aerospace and aeroplane technology is used in the **brillencio**. The housings made of magnesium are ultra-light, high impact resistant and robust.

Runs very smoothly
The long wheelbase means that the **brillencio** glides over the lawn pass after pass, stably and on track – attractive, clean cutting guaranteed!

Perfect Balance
The grass box is arranged in such a way on the **brillencio** that its weight is transferred to the rear axle when full.

Convenient Vario-drive
Several models save the gardener from having to push the mower because they have driven wheels. The Vario-drive with infinitely variable adjustable speed enables the **brillencio** also to handle large areas and lawn areas on slopes without difficulty.

Push or pull – the brillencio lawn roller

The basis of an attractive lawn is the soil preparation when sowing the grass. The hand operated lawn roller presses the lawn seed against the soil ensuring good germination and equal growth.

Hang on: after the lawn has been mown for the first time, the lawn roller can be directly attached onto the **brillencio**, thereby achieving an additional compacting of the soil.

brillencio electro

The **brillencio** electro is ideal for small to medium sized gardens of individual houses. However, considerably larger areas can also be cut without difficulty with the powerful 1,500 W motor.

The innovative cutting geometry of the mowing mechanism also handles tall and damp grass extremely well.

Although it has a cutting width of 41 cm the **brillencio** electro enables to proceed fast and it is very easy to handle and manoeuvre.

The low weight of the plastic housing contributes to this. The wide handles mean that the mower is easy to move around the garden.

The advantages at a glance
The greatest benefit is provided by the new BRILL design for the grass box, which protects the user's back.

The multi-function box, which acts as a silencer, is opened by a well-designed hinge mechanism, releasing the grass box and enabling the user to remove it whilst in a standing position.

The **brillencio** system, used throughout the range, retains dust, grass and pollen reliably. A clean cut is guaranteed by the long wheelbase, the excellent smooth-running of the lightweight wheels and cleverly designed balancing of the weight.

With its infinitely variable height adjustment from 30 to 80 mm, the **brillencio** electro 41 E can handle any situation.

The functional, two-handed safety switch enables the **brillencio** 41 E to be switched on easily.

No blade of grass is spared

Robust, sheet steel housing, powerful engines and large cutting widths characterize the new **Steelline** petrol mowers. Fitted with extra-large rear wheels, the petrol mowers are extremely manoeuvrable and demonstrate their great mobility even when the ground is uneven. The grass is cut perfectly even when it is long.

The mowers are fitted with powerful Briggs & Stratton or Honda engines and some of them have a single speed wheel drive giving 3.5 km/h. The 52 series model is executed as standard with discharging of the grass to the side and the mulching function.

Easily adjustable
The integrated spring system enables the cutting height to be conveniently set centrally to seven different heights from 30 to 80 millimetres.

Clean mowing
The grass box made of robust plastic holds 65 litres and can be removed easily.

Easy to manoeuvre
The extra large wheels with single-speed wheel drive ensure more grip and simple handling.

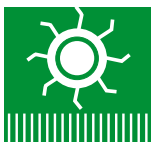

Easily visible
The practical level indicator shows when the grass box has to be emptied.

Hattrick® The all-rounder

Aerating, mowing, collecting – the multi-function machine that can do everything

Spring-clean for the lawn! The **Hattrick** aerates, mows and collects in one operation. The aerator roller on the front thoroughly removes thatch and moss from the lawn. It is equipped with robust, durable steel tines, which aerate the lawn as they rotate. The aerator roller is activated via the connection button.

The dual channel air system ensures an optimum mowing and collection performance under all conditions, so that the removed thatch and the grass clippings land safely in the large grass catcher.

The comfort panel with ergonomic handle guide and practical cable guide is clearly arranged and particularly pleasant to operate.

Mulching with the BRILL MulchCut

When mulching the grass cuttings are finely cut and returned directly to the lawn and serve as a source of moisture and natural fertiliser. The Mulch Set is part of the special equipment of the **Hattrick**. It is simply hooked into the collection chute in place of the grass box.

BRILL Cylinder Mower

The razor-sharp fitness programme

RAZORCUT

The classic lawn mower now in a new design. Worthy of note is the modern shape of the robust and foldable handle bars in silver and grey with ergonomic foam rubber handles.

The large wheels with their special profile also ensure convenient working as does too the attractive "rear spoiler" which ejects the grass cuttings in a controlled manner. Mowing with the cylinder mower means precision cutting of each single blade of grass. Precision sharpened to a hundredth of a millimetre, blade cylinder and bottom blade of special hardened steel leave a lawn cut as if with scissors whereby the contactfree cutting technique – a BRILL invention – ensures quietness. Mowing is less sporty but easier with the battery-powered BRILL **RazorCut**. This is suitable for average sized lawns of up to 300 m².

EAN	40 09093 001969	
Material	Woven nylon, reinforced with steel frame	
Cutting width	30 and 33 cm	
Weight	1.3 kg	

It could not be simpler: The battery can be withdrawn for changing in a single movement.

The cutting height adjustment of the RazoCut is infinitely variable from 14 to 45 millimetres or from 20 to 45 millimetres respectively.

Heat-treated cylinder blades ensure precise cut.

Your lawn breathes a sigh of relief!

The scarifying of the lawn is an important requirement for the obtaining of beautiful thick green grass. Only a powerful lawn scarifier effectively removes thatch, moss, cuttings and dead vegetation. Nutrients, air and water are otherwise unable to penetrate deep down to the roots of the grass. You gain the best results with the electric lawn scarifiers from BRILL.

With working widths of 30, 32, 36 and 38 cm and powerful electric motors from 1100 to 1500 watts, the new BRILL electric scarifier is even able to remove thatch and moss from larger areas.

The new BRILL lawn scarifier is also available as a powerful model with a petrol engine. With its wide working width of 40 cm, it guarantees efficient scarifying.

Height control

And your lawn takes a deep breath...

The BRILL lawn scarifier – clever technology:

- a compact design with functions easy to use
- central transport and parking position which can be operated from above
- infinitely variable height adjustment for the blade roller
- optimised discharge chute
- height-adjustable bars permitting ergonomically effective working
- carrying handles for easy transportation
- space-saving

A beautiful, thick lawn needs air

Ideal care

Scarifying is best carried out in the spring at the start of the period of growth and once again in the late autumn. The lawn aerator on the other hand can be used more often, because the interference is not so severe. Comparable to a vigorous raking, the rotating steel tines of the aerator roller scour through the space between the individual lawn plants. This means that excessive formation of thatch is prevented and the lawn remains healthy and vigorous over the entire year.

Scarifying and aerating: two in one.

BRILL Lawn scarifiers – no problem with thatch and moss

The absolute freedom in the garden BRILL battery 24 Volts

Power in the pack: BRILL power battery

With the BRILL battery range, amateur gardeners have the experience of absolute freedom of movement in the garden. The BRILL **compact battery** even makes them independent of the mains, especially in awkward areas. It is carried direct on the body with a shoulder strap and belt clip. That is comfortable and means that the user hardly feels the weight of the connected tools.

The high performance 24 Volts technology guarantees a long running time. It can be used as a powerful source of energy for up to 5 pieces of battery operated tools. The BRILL **power battery** is connected by a short spiral cable with a clip in plug. Just push it into the BRILL **power battery** and off you go.

2in1 Aerating, sweeping: two in one.

BRILL Lawn Aerator ...provides the lawn with fresh air!

The unique 400 RLB **manual lawn aerator** from BRILL with a full power 24 volt battery provides the lawn with fresh air and with its additional sweeping function, it is a combi-tool with a practical double use.

It aerates the lawn by carefully freeing it from thatch and moss. The handy battery-powered tool reaches all corners. After completing the work on the lawn, you simply push the brushes on and sweep your path or terrace clean without any effort. The debris is collected in the container.

Simple to combine

The battery and the battery-powered tools are all available individually. Only the **battery spindle mower** RazorCut Accu 38 is supplied as standard with a 24 Volt power battery. This does, however, also fit all other tools. In this way amateur gardeners can put together their individual equipment.

The relaxing way to cultivate the soil

BRILL Gardenboy 400 GB

The **BRILL Gardenboy** is the universal garden tool for preparing and looking after your beds. With its specially hardened steel prongs it scarifies the earth without mixing up the layer of humus in the top soil and the natural order of the useful micro-organisms. Thanks to its low weight and back-friendly ergonomic design the **BRILL Gardenboy** makes sure that the hard work required in looking after a garden becomes a pleasure. The **BRILL Gardenboy** – the innovative electric soil harrower for edge-trimming, scarifying, harrowing, loosening and weeding.

Art no	65052

Output/power	350 W
Engine	230 V
Working width	Approx. 100 mm
Housing	High impact-resistant PA/ABS plastic
Technology	2 x 3 tines made of rolled carbon steel, oscillating rotation of approx. 90°, 550 movements back and forth per minute
Handle bars	Fixed
Lower handle	Infinitely adjustable and rotatable
Safety	Mechanic safety clutch as overload protection
Weight approx.	2.3 kg
Working depth	80 mm

Always with a beautiful edge

BRILL Lawn edge trimmers are an all-round tool for edges and corners, their services are required whenever grass grows out of control. For example, around fences and hedges, walls, tree trunks and other places where access is difficult.

The rotating nylon cord with a high speed motor also produces a clean cut along beds and lawn edges. You have a choice of four different models to meet every demand.

All BRILL Hedge trimmers are equipped with powerful motors and can cut branches up to 24 mm thick cleanly and precisely with their hardened safety blades.

All the models are balanced so that they feel comfortably in the user's hand and the three-sided handle is easy to operate.

BRILL power battery 24 volts required
Capacity approx. 60 min with fully charged battery

BRILL power battery 24 volts required
Capacity approx. 75 min with fully charged battery

With the LH and ESK shredder, the cut material is drawn in by the rotating cutting wheel.

The 64 l collector box protects the blade access from below.

The indexing bolt guarantees safety. It prevents the unit starting on its own when undertaking relatively small pieces of assembly work.

BRILL shredders turn hedge trimmings and tree cuttings into valuable shredded material in no time at all.

The starter
As a powerful starter model, the MH model is a real fast-runner and works with the well proven flat blade technology.

The power models
Innovative cutting techniques especially make the LH and ESK models quiet and especially easy to use.

BRILL LH and ESK garden shredders
With the LH and ESK models, the shredder material is broken up by crushing and cutting, enabling it to rot more easily. The collecting box fulfils an important additional function in the 2000 ESK and 2300 ESK models: it is not only storage space for the shredded materials but it also forms a safety factor because it protects the discharge opening from access. Therefore, no-one can accidentally reach into the cutting mechanism from underneath while it is operating. If the box is removed, the unit switches off immediately. The long distance between the filling hopper and the blade mechanism forms an additional safety factor in the 2300 ESK.

BRILL ProfiCut 2800 MH
This powerful universal shredder represents an energetic helper in the garden. Fitted with a 2.0 kW motor and a unique cutting mechanism, it chops up branches with a thickness of up to 5 cm without any problem. Safety is ensured by the large filling hopper with chips/slivers protection system as well as the automatic start-up safeguard. Its two large wheels allow the shredder to be transported easily.

The integrated toolbox for spare cutter and operating instructions is very practical.

Easily accessible cutting mechanism with directly driven flat cutter plate, crown knife and triangular cutters with three cutting edges.

Comfortable mowing of large areas

Optimized in respect of function and design, BRILL's lawn tractors now offer even more convenience and performance. The new **Crossover** models have powerful engines and are optional equipped with hydrostatic travel drive, electric emptying of the grass box per rocker switch and an electromagnetic clutch for the cutter which enables the blade to be switched on in a simple manner. With cutting widths of 74, 92 and 102 cm the range permits

even large lawns to be mown comfortably and rapidly. The 92 and larger models have an asynchronous cutting mechanism with two suction-reinforced wing blades and ball-bearing-mounted V-belts. The 13 to 20 HP Briggs & Stratton or Honda engines ensure a high mowing performance. The extra large tyres on the 102 series mower give more driver comfort especially on difficult terrains.

Smooth running

Tractors with hydrostatic travel drive can be manoeuvred without jerks and steplessly per pedal.

Well lit

The standard fitting out with xenon lamps means that the ambient surroundings are well illuminated.

Convenient to operate

The central cutting height adjustment device is positioned directly next to the driver's seat.

The BRILL Mulch System

The lawn needs a great deal of moisture in the summer to prevent it drying out. Mulching proves to be extremely practical and effective, especially on large gardens. For the fine grass cuttings provide the lawn with moisture and fertiliser at the same time, in addition there is no need for any waste disposal.

BRILL Lawn tractors – fun to drive in the garden

Ideas for the Garden

**POWERED by
Honda
Engines**

The BRILL Honda lawn tractors are equipped with a very efficient engine. They start easily, run smoothly and quietly and keep a clean cut even when mowing thick lawns.

BRILL quick release coupling with drive

Art no 78973
EAN Code 40 09093 897302
Accessory for front sweeping machine and snow-clearing panel

BRILL quick release coupling without drive

Art no 78977
EAN Code 40 09093 897708
Accessory for snow-clearing panel

BRILL driving set for mechanic blade coupling

Art no 78985
EAN Code 40 09093 001860
Accessory for front sweeping machine

BRILL driving set for electromagnetic blade coupling

Art no 78986
EAN Code 40 09093 001877
Accessory for front sweeping machine

BRILL snow-clearing panel TS 125

Art no	78982
EAN Code	40 09093 100204
Working width	125 cm
Clearing panel	Sheet steel, swivelling operation from the driver's seat in 5 mountings, under edge of panel with rubber strip
Weight	42 kg
Dimensions (l x w x h)	46.5 x 125 x 42 cm
Connection	Quick release coupling system

Mounting frame and quick release coupling required as accessories.

BRILL universal spreader

Art no	78714
EAN Code	40 09093 871401
Spreading width	300 – 360 cm
Capacity	Approx. 80 kg
Tyres	16" x 4"
Hopper	Polyethylene

Trailer coupling required as accessory.

BRILL trailer coupling

Art no	78987
EAN Code	40 09093 001884

BRILL charger for tractor battery

Art no	78989
EAN Code	40 09093 001907

BRILL front sweeping machine TK 520

Art no	78943
EAN Code	40 09093 894318
Sweeping width	120 cm
Sweeping brushes	Weather-resistant plastic core, nylon brushes
Sweeping roller	30 cm diameter
Supporting wheel	pneumatic tyres, infinitely variable
Housing	Sheet steel structure
Gearing	High performance worm gear, V-belt drive
Total weight	48 kg
Connection	Quick release coupling system

Including debris container. Mounting frame, quick release coupling and driving set required as accessories.

BRILL mounting frame

Art no	78984
EAN Code	40 09093 001853

Accessory required for front sweeping machine and snow-clearing panel

BRILL mulching wedge for 92 cm mowing deck

Art no	78992
EAN Code	40 09093 001921

BRILL mulching wedge for 102 cm mowing deck

Art no	78991
EAN Code	40 09093 001914

BRILL trailed sweeper

Art no	78709
EAN Code	40 09093 001174
Sweeping width	96 cm
Collecting capacity	270 l
Sweeping brush	Diameter 10 – 25 cm
Height adjustment	Central, infinitely variable
Area of use	Sweeping up leaves and cut grass from the lawn

Trailer coupling required as accessory

BRILL towed trailer

Art no	65040
EAN Code	40 09093 610536
Load-holding area	293 l
Pan	Steel
Loading aperture	Steel, removable, reinforced guide
Load weight	max. 292.5 kg
Dimensions	108 x 82 x 30 cm

Trailer coupling required as accessory

BRILL deflector/swath shield

Art no	78993
EAN Code	40 09093 001938

BRILL service and exposition rack

Art no	78988
EAN Code	40 09093 001891

BRILL lawn aerator

Art no	78713
EAN Code	40 09093 871302
Aerator stars	15 pieces
Working width	102 cm
Working depth	Up to 64 mm
Wheels	Plastic 7" x 1.75"
Weight	Approx. 27 kg

Trailer coupling required as accessory

BRILL lawn roller

Art no	78712
EAN Code	40 09093 871203
Working width	91 cm
Weight when empty	Approx. 18 kg
Maximum weight filled with water	180 kg
Roller material	Non-rusting, reinforced polyethylene

Anhängerkupplung als Accessories erforderlich.

BRILL snow chains

for 74 cm model	Art no	78716
	EAN Code	40 09093 001846
for 92/102 cm model	Art no	78725
	EAN Code	40 09093 872507

BRILL line cassettes

Art no	75025
EAN Code	40 09093 502503
Suitable for BRILL tools	300 RT
Cord thickness/length	1.4 mm / 1 x 4 m
Use with other manufacturer's equipment	ufo 69000, 68000, 2000 K, 2500, 12 E/libero 100/light 90, 100, 300 accu/handy 100/ RT 250/2120/2124/RT 1120

Art no	75060
EAN Code	40 09093 506006
Suitable for BRILL tools	200, 270, 350 RT Tipp, 270 ART
Cord thickness/length	1.4 mm / 1 x 6 m
Use with other manufacturer's equipment	ufo 69600/libero 200/light 200, 300/handy 200/TopGarden 3000/RT 300/2230/2125/2227/3230CS/1120TA

Art no	75062
EAN Code	40 09093 506204
Suitable for BRILL tools	400 RT DuoTipp
Cord thickness/length	1.6 mm / 2 x 3 m
Use with other manufacturer's equipment	ufo 3500TA, 4000TV/3540 LX/TopGarden 3500

Art no	75035
EAN Code	40 09093 503500
Suitable for BRILL tools	450 RT Duo-control, 400 RT Twinmatic
Cord thickness/length	1.6 mm / 2 x 3 m
Use with other manufacturer's equipment	ufomatic, ufocontrol, ufotronic/3545 CXS

Art no	75045
EAN Code	40 09093 504507
Suitable for BRILL tools	1000 EF

Cylinder mower grass catcher

Art no	65041
EAN Code	40 09093 610628
Material	Woven nylon, reinforced with steel frame
Weight	1.5 kg

50 l scarifier grass catcher

Art no	62070
EAN Code	40 09093 620702
Material	Woven nylon, reinforced with steel frame
Weight	1.8 kg

35 l scarifier grass catcher

Art no	62073
EAN Code	40 09093 001013
Material	Woven nylon, reinforced with steel frame
Weight	1.5 kg
